

Twain2 EVM Desktop Conference system

System Description

The EVM Conference System can be employed as a portable or installed solution, providing user-friendly solutions for Municipal Councils, Executive Committees, Management Committees, Workshops, Seminars and Tribunals where recording and subsequent documentation is a priority. A key feature of the system is that it employs Twain2's proprietary EasyAmp technology that implements external integrated powered speakers that can be expanded in the same daisy-chain fashion as the microphone units. Heavy duty Aluminium Flight cases are available as an option.

Quick and easy set-up Lightweight yet robust construction Dual power - 12 Volt DC or 110/220 Volt AC Multiple recording outputs USB computer interface Recording volume control Dual line input (no mixer required) Chairman override EasyAmp Powered loudspeakers (no amplifier required) Portable or permanent installation Single power input for complete system including sound reinforcement.

Heavy-duty flight cases
