Twain2

Corporate Profile

Twain2 is a turnkey solution provider for the Executive Sector. Our product range provides for Boardrooms, Council Chambers, Houses of Parliament, Courts, Conference Venues, Committee Rooms, Auditoriums, Lecture Halls, Training Centre's as well as Executive and Administrative offices and private Home Cinemas.

Our product range secures functional platforms through integration, enabling **Executives** to provide their organizations with effective leadership, fulfilling their mandates through pure communication.

The range for the **Executive** sector is inclusive of but not limited to:

- **Turnkey** projects for New Chambers, Boardrooms, Auditoriums and Conference Centers
- **Upgrading** and refurbishment of existing Chambers and Boardrooms
- Conceptually superior **Audio Visual** systems
- Audio Visual **Control** systems for Boardrooms and Auditoriums
- **Public Address** and Evacuation systems
- **Executive Seating** Solutions
- **Public Seating** for Visitors and Observers inclusive of Pressrooms
- **Auditorium** Seating Solutions
- Commercial and Bespoke **Conference desks**
- **Office** Furniture
- Desk mount **designer electrical** and network/telephone sockets
- Window **Blinds** (Electrical & Manual)
- **Carpeting** & Wood & Leather Flooring Solutions
- State of the Art digital intelligent **recording** and **minute/transcription** solutions

Research and development ensures that integration of our products is continually enhanced.

Services

- a. Twain2 is positioned to manage and execute any interior refurbishment of “Meeting Venues” as a supplier of first instance (without appointment of sub-contractors).
- b. Meeting Venues includes places where people congregate for the purpose of training, discussion and decision-making, multi purpose venues such as Auditoriums and Conference Centres that may also be utilized for entertainment purposes such as weddings and cultural activities.
- c. Twain2 does not execute any “wet” construction projects.
- d. Twain2 does not execute any “Cabinet” making. For Cabinet making where bespoke desks and other paneling or woodwork needs to be done, Twain2 appoints suitably qualified sub-contractors to complete such work but the design and construction of such work can be specified by Twain2 to provide for special purposes such as internal channeling for communication, electrical and other required cabling and fitments. Minor carpentry, however, is executed in the first instance.
- e. Twain2 provides, when required, architectural designed layouts for the Clientele. Any such designs are done in conjunction with registered Architects.
- f. All other aspects of such interior fitment fall within the scope and abilities of Twain2. This is inclusive of the fitment and installation of all the products that Twain2 provides as an OEM (Original Equipment Manufacturer) supplier of first instance.
- g. Twain2 offers a product range that is inclusive of all products that may be used in the venues as described.
